

GWF

good work foundation

Be a catalyst for change in **creating a better world.**

THE WISH LIST

A wish list of **good work.**

Imagine a world where every child, regardless of their socio-economic background, has access to a world-class education. At the Good Work Foundation, this is not just a dream—it's our mission. We are dedicated to reimagining education through digital transformation, ensuring that the future generation is equipped with the skills and knowledge they need to thrive in a ever changing world and to always remember what it is be human.

What are our **needs** and how can you **support** us?

WISH #1: **SPONSORED TRANSPORT**

One vital aspect of our work that is often overlooked is getting learners to and from the GWF learning centres.

Every day across all six of our GWF campuses, in collaboration with a network of 29 schools, we need to transport an average of about 2,500 learners each week. These children are safely collected from their schools in rural locations and transported to the GWF campuses to participate in educational programs, before being safely returned to their schools to complete their day. This simple act of transportation is a critical link in allowing GWF to have the greatest impact on widespread communities. Without this transport, the Open Learning Academy cannot work.

Option 1: All six campuses
Across all six GWF campuses, the total cost needed for transport is $203,333 (R3.66 million) annually, or $20,333 (R366,000) monthly over 10 months.

Option 2: One campus
For one GWF campus, the total cost needed for transport is $122,222 (R2.2 million) annually, or $12,222 (R220,000) monthly over 10 months.

WISH #2: **CREATE ACCESS TO OPEN LEARNING**

One of our flagship initiatives is the “Bridging the Gap” program, or Open Learning Academy, which specifically targets young learners in rural areas. Through this program, students are introduced to a world of possibilities, from coding and robotics to virtual field trips that broaden their horizons. We have witnessed remarkable transformations—students who were once disengaged and disinterested are now passionate and eager to learn. This program reaches 5,071 learners annually.

Option 1:
Sponsor 5071 learners to attend this program for $700,000 (R12.6 million) (includes all campuses). Note: This includes all transport across all campuses.

Option 2:
A smaller customized breakdown for only one campus can be provided if requested.

WISH #3: **SPONSOR A LEARNING CENTRE FOR A YEAR**

Since our inception, we have established digital learning centers that serve as hubs of knowledge and inspiration. These centers provide students with access to the internet, digital resources, and interactive learning tools. Our programs focus on critical areas such as STEM (Science, Technology, Engineering, and Mathematics), digital literacy, and life skills, preparing students for the jobs of tomorrow.

Option 1:
To sponsor a **Central Learning Campus** annually is $586,666 (R10.56 million).
A Central Learning Campus is a mothership that can support up to 10 schools. This includes all operational costs from start to finish, including programs in the Open Learning Academy and Bridging Academy.

Option 2:
To sponsor a **Satellite Learning Campus** annually is $233,333 (R4.2 million).
This sponsorship includes programs in the Open Learning Academy and Bridging Academy.

WISH #4: **GWF SPONSORSHIPS**

- Sponsor a Teacher for a Year: $5,000 (R90,000)
- Train a Teacher for a Year: $4,266 (R76,800)
- Sponsor One Bridging Year Academy Student for a Year: $1,033 (R18,600)
- Create a GWF Access Moment for a Child: $8 (R140 per learner session)
- Sponsor an ICT Academy Student for a Year: $3,333 (R60,000 per student)
- Sponsor a Hospitality Academy Student for a Year: $4,066 (R73,200 per student)
- Sponsor a Conservation Academy Student for a Year: $8,133 (R146,400 per student)

WISH #5: **FUNDING THE ENGINE ROOM**

The **WIG.**

WIG stands for Wildly Improbable Goal. It is often used in contexts where ambitious, almost unimaginable goals are set to drive significant progress and innovation. The term encourages thinking beyond conventional limits and striving for extraordinary outcomes. Would you like to help us achieve our WIG?

The Engine Room:
The engine room of an NGO is vital, requiring the operational costs that enable the organization to function effectively. These costs, while not directly funding projects, allow the NGO to hire top talent, establish a strong management structure, and ensure sustainability within the leadership team. This infrastructure is crucial for maintaining the vision and energy that drive the NGO's mission forward. By investing in these operational overheads, donors help build a resilient foundation, ensuring that the NGO can deliver impactful, long-term results. Supporting the engine room is an investment in the organization's overall success and stability.

The Need:
$833,333 (R15 million)

Thank **you.**

While we have made significant strides, there is still much work to be done.

Our vision is to expand our reach and impact to even more lives. To achieve this, we need partners who share our commitment to education and innovation. By supporting the Good Work Foundation, you will be investing in the future of countless children who have the potential to become leaders, innovators, and change-makers.

With deep gratitude for your consideration.
